Dedicated to fitness equipment from 2004, large-scale investment

It occupies an area of 28,000 square meters of modern production plants and introduces advanced production technologies such as laser processing and spraying in Germany, and grasps the quality standards of each product.

Advanced robotic equipment, forging precision craftsmanship

International advanced robotic welding guarantees the quality and stability of each welding joint and every detail, striving for perfection!

360 degree assembly

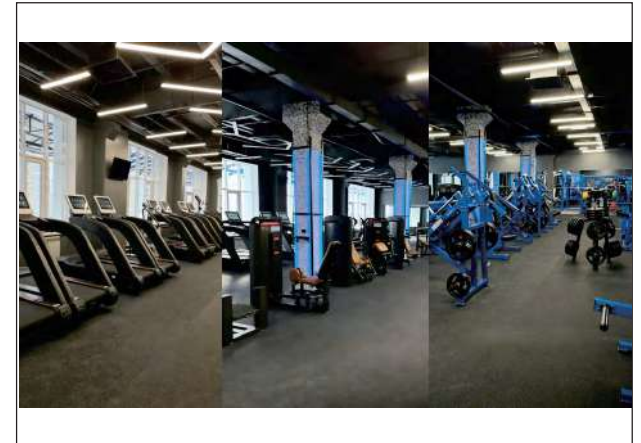

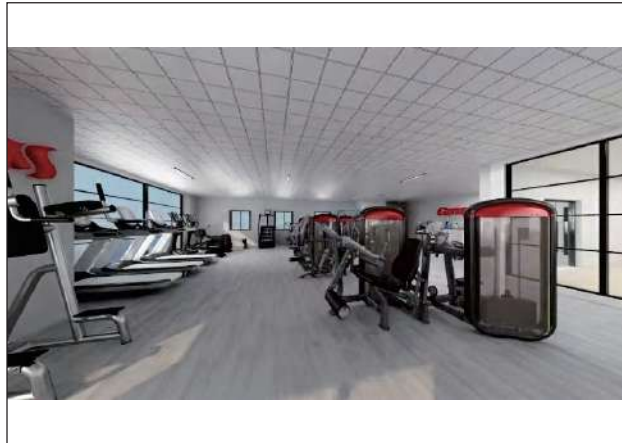

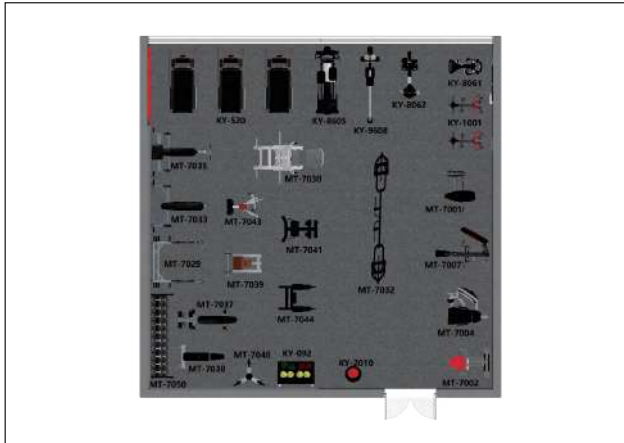

Each worker pays attention to the angle and crevices of each accessory. Each machine is tested for 24 hours, even the smallest details are never perfunctory.

Strong wooden box packaging

The products are packaged using standardized wooden boxes, cartons and accessories, with six layers protection. Logistics distribution is provided in more than 200 countries and more than 300 cities, and equipment is better protected during transport loading.
